E-mail: sales@firstchoicebuildingproducts.com

Your SW300 Signal Switch includes:

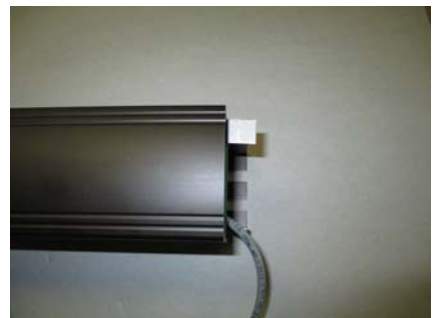

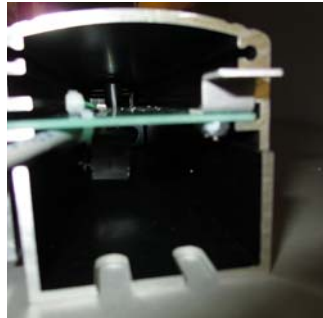

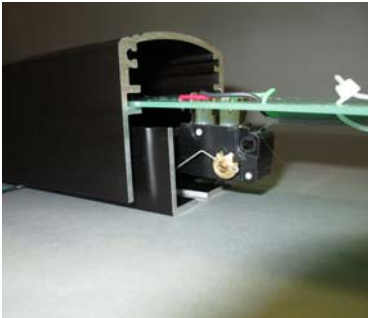

One Series SW300 Signal Switch Board

One 9" long ,3 wire lead (attached)

Step 1—Install the SW300 Switch Board into the exit device push bar.

- A. Hold the trigger depressed while inserting the board into the push bar.
- B. Insert the board into the widest groove with the trigger facing toward the bottom (the channel) of the exit device.

Step 2—Finish installing the exit device, including installation of the hinge side push bar end cap.

Note: The wire lead can be routed through a hole in the door which would require adding a hole through the back of the Hinge Stile Mounting Bracket.
